

425-6491  
WIDE BODY AR/ZRT CONSOLE  
INSTALLATION INSTRUCTIONS

The Wide Body AR/ZRT Console is a standard console designed to be secured to a Jotto Desk Floorplate (Tahoe/Silverado/F-150/F-250/Expedition).

Once the floorplate has been installed in the vehicle, place your bolts into the floorplate extrusion slots to align with the slots on the bottom mounting section of the console.

As the pickup truck dashes are all different, there will need to be some forward/backward adjustment, depending on the barrel length of the AR-15 being secured in the console.

We have found that the Ford F-150 dash requires the console to be positioned further away from the dash of the vehicle.
